

**This is the most preferred way to place out your garbage and recycling carts**

**Do not place your cart next to your mailbox, this will make it hard on your mail carrier, plus put your mailbox at risk of being damaged if the recycling truck attempts to pick up the cart.**

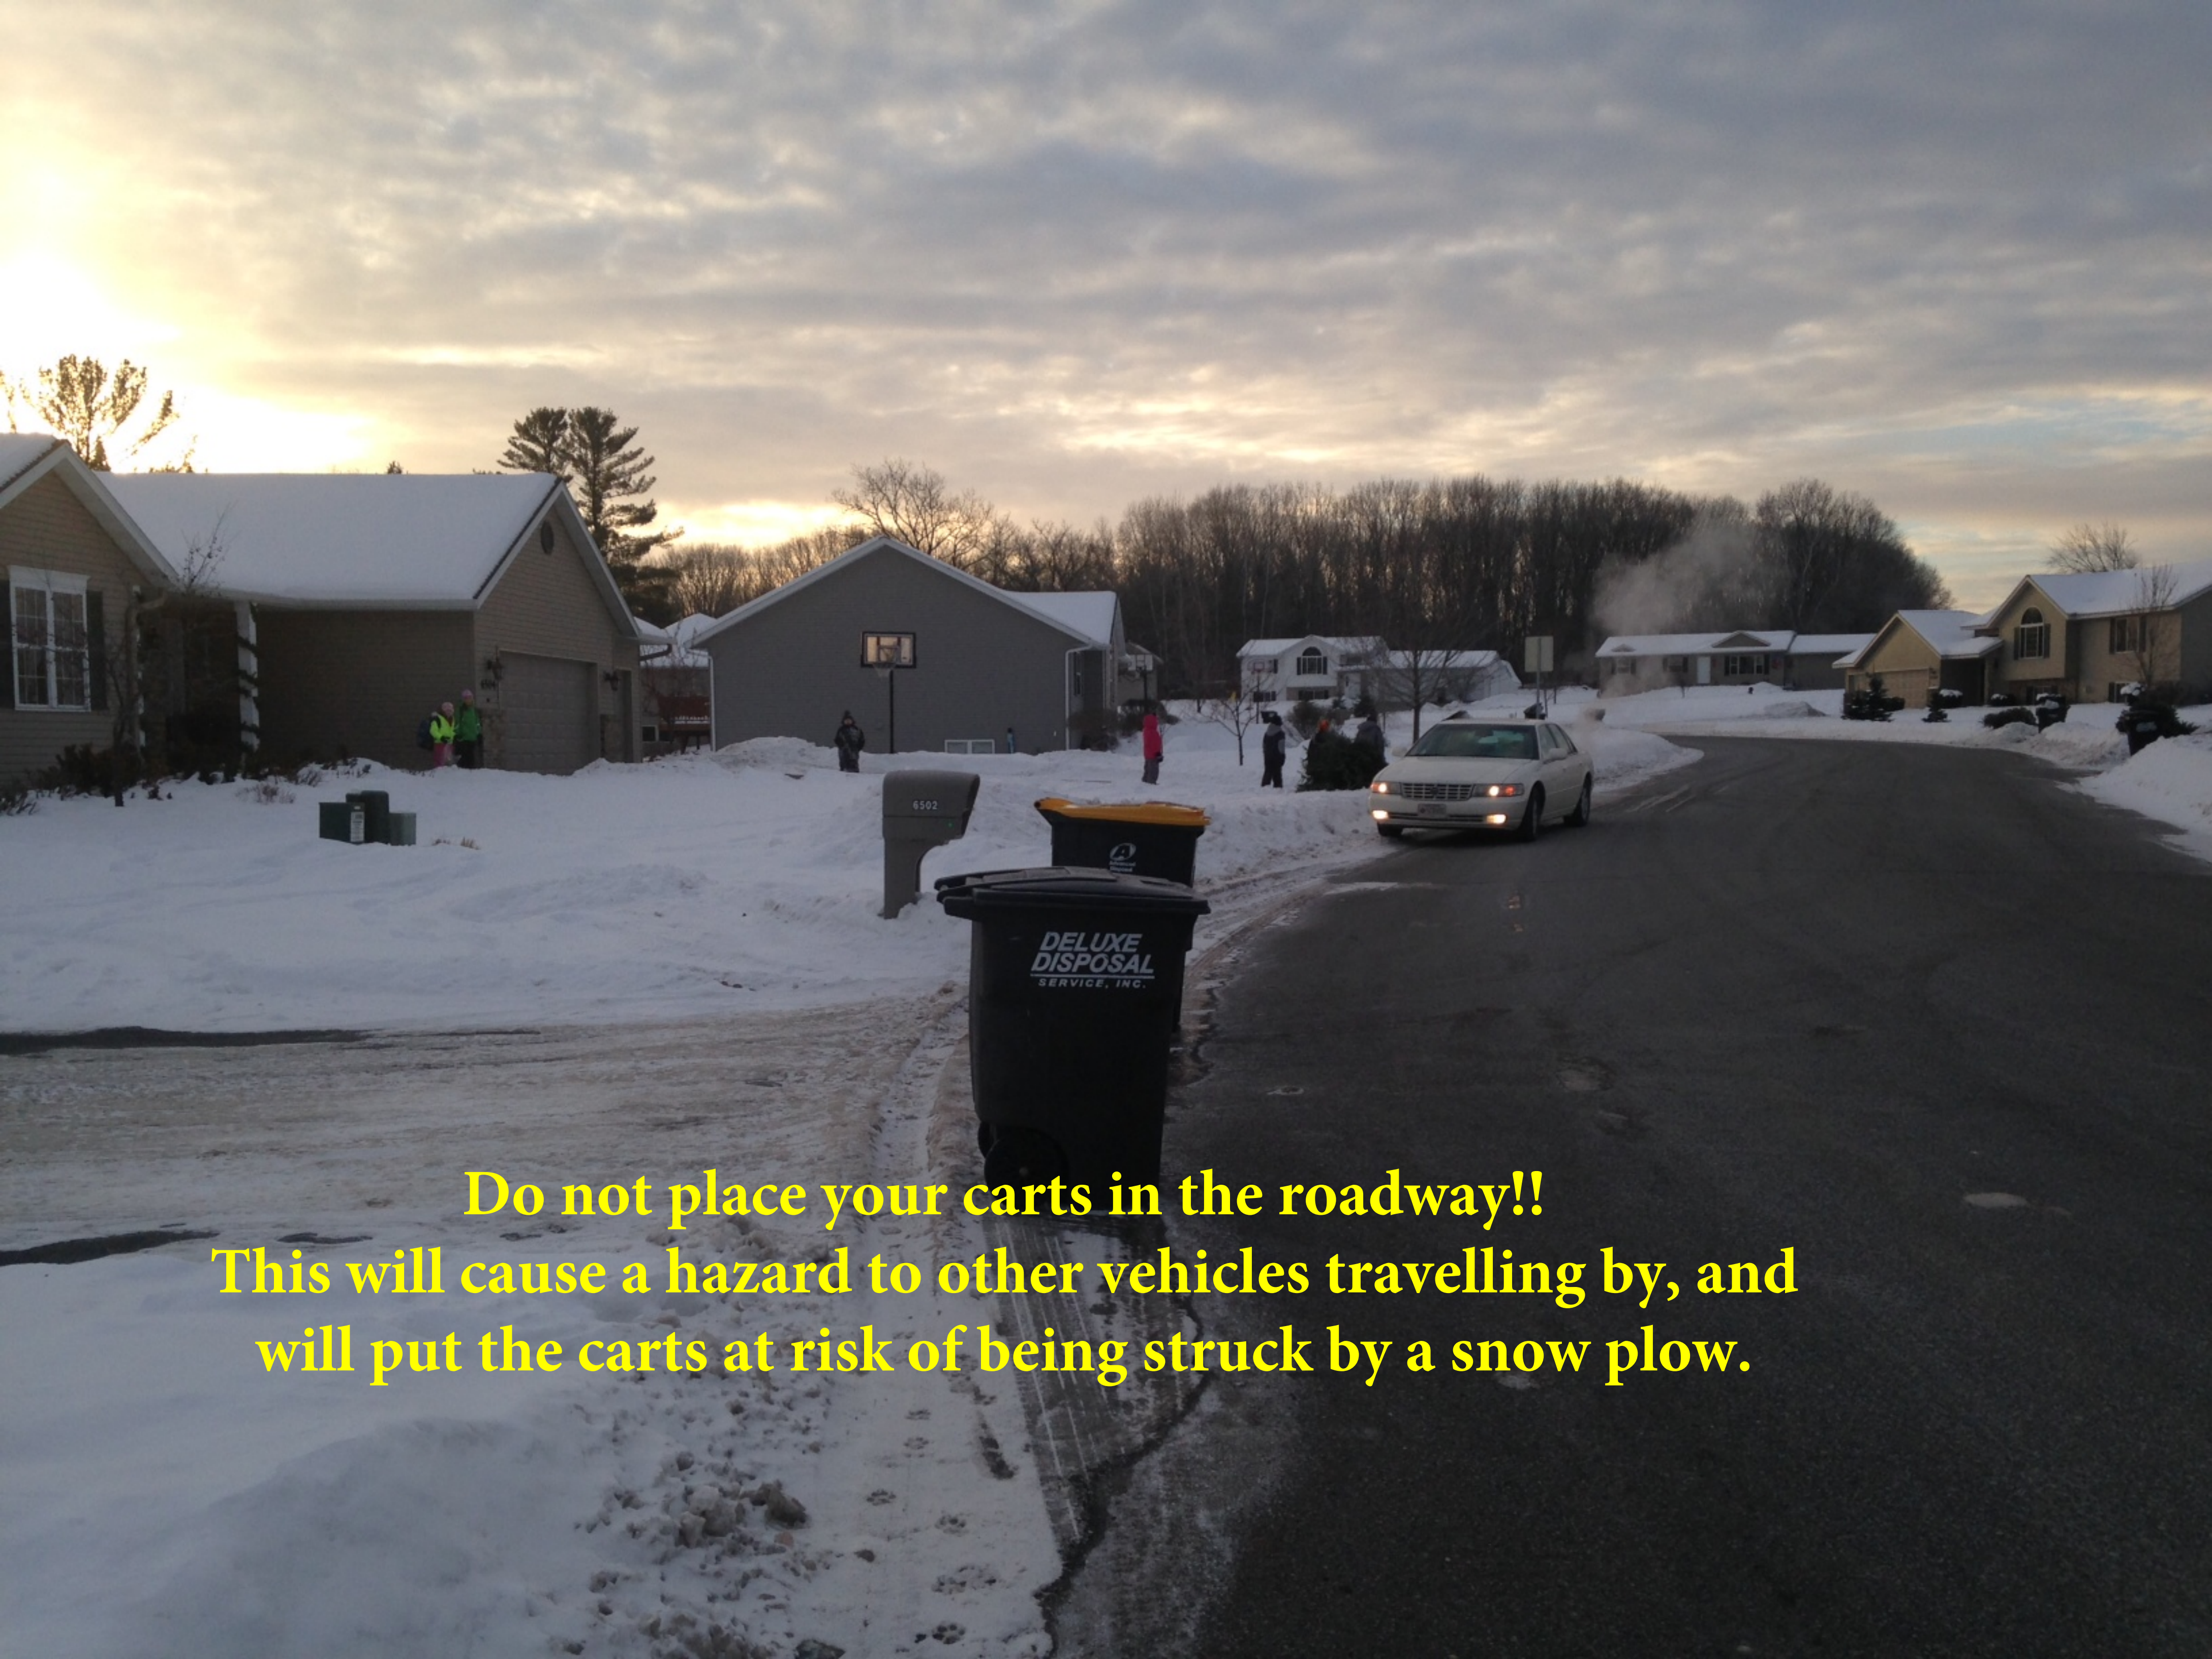

**Be sure there is enough space between the two carts  
as Advanced Disposal's truck's claw needs enough  
room to safely grab and empty the container**

**It is preferable to have the carts on either side of your driveway rather than together on one side (these are too close together)**

**Do not place your carts in the roadway!!  
This will cause a hazard to other vehicles travelling by, and  
will put the carts at risk of being struck by a snow plow.**

**Do not place your carts in the roadway!!  
This will cause a hazard to other vehicles travelling by, and
